Professional Summary

Motivated and detail-oriented Frontend Developer with hands-on experience building responsive, user-friendly web interfaces using React.js, JavaScript, and Tailwind CSS. Proven ability to lead frontend development teams, translating designs into clean, functional, and fully responsive interfaces optimized across mobile, tablet, and desktop devices.

Complemented by backend development experience with Node.js, Express, and MongoDB, as well as proficiency in consuming RESTful APIs bringing a well-rounded, full-stack perspective to every project.

Known for writing clean, readable code and thriving in collaborative team environments. A creative problem-solver with a strong eye for detail, currently seeking full-time opportunities in frontend or full-stack development.

Technical Skills

Frontend Development

JavaScript (ES6+), React.js, HTML5, Tailwind CSS, Responsive Design, TypeScript

Backend Development

Node.js, Express.js, RESTful API Design, Authentication & Authorization.

Database Management

MongoDB, Mongoose.

Tools & Practices

Git/GitHub, Postman, VS Code, Debugging.

Frontend Development

Proficient in building modern, responsive web interfaces using React.js, JavaScript (ES6+), HTML5, and Tailwind CSS. Experienced in crafting pixel-perfect, mobile-first layouts that adapt seamlessly across all screen sizes and devices — ensuring a consistent and polished user experience from mobile to desktop.

Backend Development

Experienced in building robust server-side applications using Node.js and Express, with a strong understanding of RESTful API design principles. Proficient in implementing secure Authentication and Authorization systems, and developing full CRUD functionality backed by MongoDB. Comfortable working across the full request lifecycle — from API design to database interaction and response handling.

PROFESSIONAL EXPERIENCE

Frontend Intern — Team Lead

- Collaborated closely with the UI/UX team to translate design concepts into intuitive, user-friendly interfaces for a large-scale project.
- Coordinated with fellow frontend developers to ensure consistency and coherence across all interface components and design systems.
- Managed the team's Git repositories, overseeing code merges, resolving conflicts, and onboarding new developers into the workflow.
- Designed and developed role-based dashboards and data visualisation charts for Admin and Super Admin user roles.
- Contributed to key architectural decisions and conducted code reviews to uphold high standards of code quality and maintainability.

Full Stack Developer Intern

- Assisted in building and maintaining web application features across both frontend and backend.
- Developed UI components using React.js and connected them to REST APIs.
- Worked on backend endpoints using Node.js and Express to handle data requests.
- Stored and retrieved data using MongoDB for various application features.
- Collaborated with the team through Git for version control and code sharing.

PROJECT

Frontend Developer — Eventra (Event Booking Platform)

- Led the frontend team in delivering a clean and intuitive user experience across the application.
- Implemented Google Sign-In authentication in collaboration with the backend team.
- Structured the project architecture including folder organization, reusable components, page setup, and client-side routing.
- Integrated motion design to enhance UI interactions and overall user experience.
- Consumed backend REST API endpoints and coordinated closely with backend developers to ensure timely API delivery for production.
- Collaborated with fellow frontend developers through code reviews, pair programming sessions, and regular Zoom meetings for updates and adjustments.

Key Achievements — Eventra

- Improved the application's loading state experience, resulting in a smoother and more polished feel during page transitions.
- Successfully led and coordinated a team of 6 frontend developers, maintaining clear communication and consistent code standards throughout the project.
- Established a solid frontend foundation including architecture, routing, and reusable components, positioning the project for a smooth and efficient launch.

Frontend Developer — Torri Gate (Real Estate Platform) *React.js · Node.js · Express · MongoDB · Tailwind CSS · Figma | 2025*

Built to seamlessly connect landlords and tenants through an intuitive and responsive web platform.

Roles & Responsibilities

- Collaborated with UI/UX designers to translate Figma designs into a fully responsive, pixel-perfect interface across mobile, tablet, and desktop devices.
- Built dynamic content rendering for property listings, ensuring smooth and consistent display across all screen sizes.
- Designed and developed a landlord dashboard where property owners can add, manage, and update available or occupied properties in real time.
- Integrated REST API endpoints for property listings, search, and house management features.
- Implemented a tenant-facing interface allowing users to browse, filter, and view available properties with ease.

Key Achievements

- Delivered a clean, role-based experience for both landlords and tenants from a single platform.
- Ensured cross-device responsiveness with zero layout breaks across all major screen sizes.
- Contributed to a faster development cycle by establishing reusable component structures early in the project.

Frontend Developer — Hospital Management System

React · Node.js · Express · MongoDB · Tailwind CSS · Figma | 2025

Built a responsive hospital management platform that streamlined interactions between administrators, doctors, and patients through a modern web-based system.

Roles & Responsibilities

- Collaborated with UI/UX designers to convert Figma prototypes into a responsive, pixel-perfect user interface across mobile, tablet, and desktop devices.
- Developed secure and user-friendly authentication interfaces for **Admin, Doctor, and Patient** roles.
- Built role-based dashboards for managing appointments, users, medical records, and daily operations.
- Designed and implemented patient appointment booking flows with intuitive forms and status tracking.
- Integrated REST APIs for patient records, appointments, doctor schedules, and user management.
- Created reusable frontend components to improve scalability, consistency, and faster feature delivery.
- Implemented responsive layouts and optimized performance for seamless cross-device access.
- Worked closely with backend logic to ensure smooth data flow and real-time updates.

Key Achievements

- Delivered a multi-role healthcare platform supporting **Admin, Doctor, and Patient** workflows in one system.
- Improved appointment scheduling efficiency through an easy-to-use digital booking process.
- Ensured full cross-browser and cross-device responsiveness with zero major UI breakpoints.
- Reduced repeated development effort by building reusable dashboard and form components.

- Enhanced user experience with clean navigation, organized data presentation, and fast interactions.

Frontend Developer — Task Duty (Task Management Platform)

React · Node.js · Express · MongoDB · Tailwind CSS | 2025

Developed a personal task management web application designed to help users organize daily activities, track progress, and manage tasks efficiently through a clean and responsive interface.

Roles & Responsibilities

- Built a responsive frontend interface for creating, managing, and tracking tasks across desktop and mobile devices.
- Implemented full CRUD functionality for task creation, editing, updating, and deletion.
- Developed dynamic task lists with status updates and real-time UI rendering.
- Integrated REST APIs for task management operations and data persistence.
- Structured reusable UI components to improve maintainability and faster feature updates.
- Optimized layout performance and user experience with clean navigation and responsive design.

Key Achievements

- Delivered a functional task management platform with complete end-to-end CRUD operations.
- Improved task organization through a simple and intuitive workflow interface.
- Ensured consistent responsiveness across major screen sizes and devices.
- Increased development efficiency by using reusable components and scalable frontend structure.

.

Frontend Developer — URL Shortener Landing Page

React · JavaScript · Tailwind CSS · Node.js | 2025

Developed a clean and responsive landing page for a URL shortener platform that enables users to convert long website links into short, shareable URLs quickly and efficiently.

Roles & Responsibilities

- Built a modern, responsive landing page optimized for mobile, tablet, and desktop devices.
- Developed URL input and shortening interface with clear call-to-action flow.
- Integrated API functionality for generating shortened links instantly.
- Implemented copy-to-clipboard functionality for easy sharing of generated URLs.
- Created reusable UI sections including hero banner, features, and call-to-action components.
- Optimized page performance, responsiveness, and user experience.

Key Achievements

- Delivered a fast and intuitive URL shortening experience through a simple one-page interface.
- Improved usability with instant link generation and quick copy functionality.
- Ensured seamless responsiveness across all major screen sizes.
- Built a clean, conversion-focused landing page with professional UI structure.

Education

Full Stack Web Development Certification

Tech Studio Academy | Lagos, Nigeria | February 2025 - May 2025

Comprehensive training in modern web development covering React, JavaScript, Node.js, Express, MongoDB, and full development lifecycle.

Higher National Diploma (HND)

Lagos State Polytechnic | Lagos, Nigeria | Completed December 2022
